Heimdal®

Elevate Your MSP Services with Heimdal XDR: Your Ultimate Partner in Cybersecurity

Introducing the Heimdal MSP alliance, where top-tier cybersecurity solutions meet collaborative innovation. In the dynamic IT environment, teaming up with Heimdal offers more than just benefits - it's your strategic edge to enhance your MSP offerings and differentiate your business in the competitive tech market.

Designed with Managed Service Providers (MSPs) in mind, our suite of cybersecurity solutions arms you with the latest technology and insights to effectively address evolving security threats and complexities.

KEY TECHNOLOGY HIGHLIGHTS:

Unrivaled XDR Portfolio

Boasting the industry's most extensive collection of XDR tools, our 10+ award-winning solutions set the standard for excellence.

Unified Multi-Tenant Management

A single, integrated console enables seamless management of all products across diverse attack surfaces for multiple clients.

Cutting-Edge Threat Intelligence

Our AI/ML-driven insights, backed by MITRE ATT&CK techniques, crowd-sourced data, and expert analysis, offer unmatched threat foresight.

Robust Cloud Architecture

Our cloud-native design ensures 99.9% uptime with zero impact on system performance, promising reliability without compromise.

Rapid Deployment

Solutions are ready to go live in minutes, ensuring immediate end-customer protection without delay.

Integrated Telemetry

Deep, native connections between products, inventories, users, and processes provide a holistic security overview of customers.

Enhanced for Microsoft 365 & Google Workspace

Our solutions seamlessly complement and extend the security of Microsoft 365 and Google Workspace environments.

Managed SOC Services

Optional access to on-demand Managed SOC services offers additional support and expertise.

Seamless Integration

Easy API integration with leading RMM & PSA tools enhances operational efficiency and service delivery.

Future-Proof Your Success: Heimdal XDR, The Premier Choice for Fast-Growing MSPs

Heimdal is revolutionizing the way MSPs deliver cybersecurity, offering a unified, AI-driven platform tailored for service providers.

Born in Copenhagen in 2014, our suite of over 10 integrated solutions is designed to empower MSPs, enabling them to provide comprehensive, proactive security across clients' IT environments. Heimdal's platform enhances MSPs' capabilities in managing diverse security needs, reducing alert fatigue, and ensuring operational efficiency. With a focus on endpoint and network security, advanced threat prevention, vulnerability management, and Zero Trust strategies, our solutions are crafted to combat threats like Ransomware and BEC attacks effectively. As a trusted partner for MSPs, Heimdal elevates service portfolios, allowing MSPs to safeguard their clients' digital assets with top-tier, proactive security measures, whether remote or onsite.

Choose Heimdal to elevate your MSP offerings and drive unparalleled customer success in the cybersecurity domain.
